

## Paper Angel tree decoration

The strange looking circle at the top of this page will make the paper angel tree decoration you can see in the photo on the right hand side. It's very simple to make, all you need are some scissors, some sticky tape and a small piece of string.

**STEP 1:** Cut out the circle at the top of this page. You may find it easiest to cut it out roughly at first, then go round again to tidy up the line.

**STEP 2:** Cut down the long line towards the angel's head and carefully follow the black line until all the lines have been cut.

**STEP 3:** Fold your paper round so that the two slots which are cuts halfway through the circle meet up and slide together. That should make the basic shape of the angel—use a little piece of sticky tape to hold the slot together.

**STEP 4:** Tie a knot in your short piece of string and thread it through the gap behind your angel's head. Secure this in place with a small piece of sticky tape.

**STEP 5:** Go and hang your angel on the tree ready to announce the birth of King Jesus!
