

The Christmas story activity book

STEP 1: Fold your coloured sheet of card in half and place the star template on top with the flat point of the star against the fold of the card. This will form the hinge of your Christmas Card.

STEP 2: Cut around the star template and the coloured card. This will create the shape of your card, check to see your Christmas card will stand up by itself.

STEP 3: Glue down some strips of straw for Jesus' crib, this could be yellow paper or pieces of string which you cut up.

STEP 4: Cut out the manger template on top of some brown paper or card to make the manger for your scene.

STEP 5: Glue the manger down on top of the straw.

STEP 6: Cut out the baby Jesus from this page and glue the tab to create a little rolled up baby shape.

STEP 7: Slide your little finger into the roll of the Jesus figure so that you don't squash it, then glue the back side so it can be glued into the front of your card.

STEP 8: Congratulations you made a star Christmas card for a friend... now you have to decide who to send it to. Write them a nice greeting on the inside!
